

2019 Homoky Dorka Pezsgő

Tokaj, Hungary

Dorka represents yet another dynamic generation coming of age in Tokaj. She's among the first to grow up in an established community of female mentors as well. Just within our portfolio, people like Judit Bodó (Bott Pince), Sarolta Bárdos (Tokaj Nobilis) and Stéphanie Berecz (Kikelet) have all been hugely influential just to name a few. Dorka is pushing the envelope in terms of low intervention winemaking, organic farming, extended skin macerations, mixing grapes and fruit, and helping pioneer new sparkling wines. Dorka is a fourth generation winemaker in the village of Tállya in the southwest corner of Tokaj. At first, she never considered wine a career, her first degrees being in film and philosophy. Her parents never pressured her to enter the wine business. However, the years away from Tokaj gave her the distance and change in perspective she needed. She started to experiment in the vineyard and cellar bit by bit. In 2016 she made the leap and spent half a year studying viticulture in Lyon where she was also exposed to natural wines followed by a harvest in New Zealand. She feels beyond lucky to not only return home to an iconic wine region, but also to her family's experience, traditions, and support. At this point, her contribution to the family is her enthusiasm and relentless energy and the perspective of having left to see how truly special this slice of Hungary is. Starting with just 1 hectare, her parent's rules were simple: You must harvest it. You must make it. You must sell it.

VINEYARDS

Dorka has since increased to 3 hectares spread across the single vineyards (dűlő) of Hetény, Dongó, Görbe, Bártfai, Sas alja, and Nyergesek. While 300+ years ago Tállya was one of the largest villages in Tokaj and arguably boasted the majority of 1st class sites, today it's not nearly as developed as other villages. Nevertheless, it's becoming an incubator for organic farming. Land is available for sale and a community of like minded growers is taking root and helping one another. Tállya is also generally windy and further from the Bodrog River than many other villages, but humidity (namely black rot) can still be an issue. While botrytis at the right time is welcomed, there's a constant dance between having a lighter canopy to promote airflow and too little risking sunburn. This is especially the case when converting to organics. Like the rest of Tokaj, the soils here are heavily volcanic. The Dongó (Bumble Bee) vineyard is Dorka's favorite running spot. The bedrock is rhyolite with quite a bit of detritus. The Hetény Dűlő is also mostly Rhyolite but with much more clay and a little bit of loess as well. Furmint and Hárslevelű dominate the plantings and the clay and better water retention yield really bright acidity, an ideal site for her sparkling wines. The Nyergesek Dűlő (saddle vineyard) produces bright fruit with often hard acidity. The acidity is so sharp from the andesite heavy soils that it needs to be tamed by either maceration, sugar and or age. First mentioned in 1469, this is mixture of Furmint and Hárslevelű and is ideal for her sparkling wines.

WINE MAKING

All grapes are hand harvested, destemmed and then pressed without crushing. Most lots are spontaneously fermented in stainless steel, then aged further on the lees in stainless along with shorter élevage in barrel due to most of her barrels being so young. All wines are bottled without filtering or fining and the only addition is SO2.

NOTES & PAIRINGS

This is a 100% traditional method sparkling Furmint from the famed Kővágó vineyard. Mentioned as far back as 1349, this is a colder site on super rhyolite heavy rocky (Kővágó = Stonecutter) soils. It's later ripening and maintains incredibly high acidity. It was first disgorged in December 2020 and then left to rest for 6 months. While this is classified as an Extra Dry, it reads far drier and like much of Tokaj, needs the extra residual sugar to coax out the volcanic fruit and tame the acidity. Only 600 bottles produced.

ANALYTICS & PRONUNCIATION

APPELLATION: Tokaj

GRAPE COMPOSITION: 100% Furmint

CLIMATE: Cool Continental

SOILS: Rhyolite, clay and loess

ALCOHOL: 13%

RESIDUAL SUGAR: 21.6 g/l

ACIDITY: 6.12 g/l
