

# 2020 Maurer Furmint

## Fruška Gora, Serbia

When we first visited Oszkár Maurer in 2015, he only had a few wines to show. Since then, we've witnessed plans like expanding his production into the Fruška Gora, opening a tasting room/restaurant, and redefining what many of these nearly forgotten grapes taste like, while always keeping a close eye on the traditions of both his grandparents and the region's 2000+ years of documented winemaking history. His aesthetic and philosophy are starting to permeate everything above and beyond the vineyards and cellar. The Maurer family has been producing wine for four generations. It was during the Austro-Hungarian Monarchy in the 19th century that they moved from Salzburg to the southern part of the Kingdom of Hungary. They now farm 15 acres of land. 6 hectares in the Serbian wine region of Szabadka directly south of the Hungarian-Serbian border, and another 10 acres in the Fruška Gora mountain district in Syrmia, Serbia, located 40 miles away from Belgrade and bordered by the Danube River to the north.

### VINEYARDS

Technically Maurer is in the Subotičko – Horgoškoj region in northern Serbia, but it was formerly a part of Hungary's Csongrád up until 1920. The population is mostly Hungarian and viticulture knows no borders. Names of grapes and places are therefore constantly changing from Serbian to Hungarian and vice-versa. Oszkár farms about 6 hectares here including the oldest known Kadarka vineyard in the world planted in 1880 in addition to other plantings in 1912 and older plots of Kövidinka from 1925. The rest of the plantings include grapes like Olaszrizling, Slankamenka, Ezerjő, Kadarka and Kékfrankos. There's also few international varieties including Cabernet Sauvignon, Merlot and Pinot Noir. Oszkár also has 9 hectares in the Srem region a little further south. Hungarians called this area Szerém, the Croats Srijem (part of it still spills into Croatia), and the Romans Syrmia. The main feature, apart from the Danube River, is the Fruška Gora Mountain. Once an island in the Pannonian Sea, the soil is volcanic with a marine layer. Some call it the "holy mountain" or "Serbian Athos" because at one point there were over 30 monasteries of which 16 still stand today. Needless to say, there is something special about this place and winegrowing is documented back to the 1200s. Planting in broad strokes, the Subotičko is largely defined by sandy soils and old vines, and the Szerémség by volcanic soils heavily influenced by the Danube River. Everything is farmed organically with zero absorbable chemicals. High density stake trained vines are the most typical and cover crops are natural. Everything is worked by hand or with the help of horses. Harvest is managed with local labor and the help of family and friends.

### WINE MAKING

Everything is handpicked in small bins and all fermentations are spontaneous (primary and secondary). The use of older oak, small and large format is paramount. There are no additives to any of the wines apart from SO<sub>2</sub> at bottling for select wines. Maurer basically has two tiers: Rege and Maurer. The Rege wines have low SO<sub>2</sub> (25-40ppm) and the Maurer line is zero compromise with zero additions of any kind. Wines are typically only racked once before bottling and everything is bottled unfiltered.

### NOTES & PAIRINGS

This is another slight departure from the previous vintage. It's still open vat fermented, spends a couple days on the skins, and is aged in large Hungarian oak, but there's less influence from botrytis than in the 2019. The vineyard is in the Srem facing Croatia, so it's much warmer here than in both Tokaj and Somló. This is a great lens into the region from what Oszkár argues is the birthplace of Furmint before making its journey north in order to escape the advancing Ottoman armies. Where the botrytis still adds some spice and honey, this vintage is more acid driven, fruit driven, and structured. Bottled unfinned and unfiltered with a touch of SO<sub>2</sub> (17ppm).

### ANALYTICS & PRONUNCIATION

PRODUCER: Maurer

APPELLATION: Fruška Gora

GRAPE COMPOSITION: 100% Furmint

CLIMATE: Sub Continental

SOILS: Volcanic bedrock

MACERATION & AGING: Open vat fermented, spends a couple days on the skins, and is aged in large Hungarian oak.

ALCOHOL: 12.5%

RESIDUAL SUGAR: 0.96 g/l

ACIDITY: 5.09 g/l
